PROFILE

Experienced Minecraft Community & Operations Manager with a proven track record in live server management, moderation, event planning, and quality assurance. Skilled in leading volunteer teams, coordinating content releases, and maintaining safe, engaging environments for young player communities. Strong background in Minecraft Bedrock development, server operations, and automation tools, with a passion for creating seamless gameplay experiences.

WORK EXPERIENCE

- Lifeboat Network**

2023 - 2025

Community Manager/Translation Lead/Event Lead
Quality Assurance/IGM Mentor & Discord Moderation

 - Oversaw community engagement, managed volunteer teams, coordinated server operations, and handled bug reports.
 - Planned and executed in-game events, seasonal events, and managed the event team.
 - Managed the translation program, volunteer translators, and ensured 100% content localization.
 - Trained and guided new moderators, improving consistency and quality in moderation.
 - Enforced rules, handled reports, and maintained a safe, welcoming environment.
 - Identified, documented, and reported bugs, exploits, and gameplay issues to the developers for fixes.
- 5 Frame Studios**

2024 - 2025

Content Manager

 - Coordinated the development and release of Minecraft Marketplace content, ensuring quality standards and timely delivery.
 - Collaborated with designers, developers, administration and QA to create engaging gameplay experiences for a global audience.
- Miracles Studios**

2024 - 2025

Lead Marketplace Developer

 - Directed and coordinated a development team, overseeing workflows, deadlines, and quality for addon projects.
 - Led content creation from concept to release, ensuring compatibility, performance, and engaging player experiences.
- Ducky Creations**

2024 - 2025

Marketplace Developer

 - Developed high-quality Minecraft Marketplace addons, including custom items, blocks, particles, mechanics, etc.
 - Collaborated with artists and designers to deliver polished, player-friendly content.

PROJECTS

Discord Bot Development

Built bots for moderation, server status tracking, player data scraping, and automation of in-game tasks.

Admin Panel Systems

Developed MySQL-backed login systems, dashboards, and UI panels for server and bot management.

Dashboard Automation

Created a custom dashboard that automates item distribution into in-game accounts by integrating with admin portal.

Minecraft Marketplace Projects

Published and Unpublished Projects

ACHIEVEMENTS

Led Lifeboat's Translation Program

Completed 100% of translations across multiple game modes and managed a volunteer team.

Trained & Mentored Staff

Onboarded and trained new moderators and trainee mentors, raising overall moderation quality and consistency.

Banned Thousands of Hackers

Maintained fair gameplay by spectating and punishing rulebreakers, hackers, and exploiters with evidence.

Promoted to Community Manager

Recognized for leadership, communication, and operational contributions at Lifeboat Network.
